

SOP-P101: Pump P-101 Maintenance Guidance

Synthetic demonstration document for SIH. Not real MRPL operational data.

Inspection

Review recent sensor trends, maintenance history and operator observations before inspection.

Vibration investigation

Check bearing condition, coupling alignment, mechanical looseness, imbalance and other causes according to the approved maintenance manual.

Evidence requirement

Record measurements, observations, actions and final findings in the maintenance record.

AI limitation

An AI assistant may summarize evidence and suggest investigation steps, but it must not authorize maintenance or directly control industrial equipment.
